

Temple Registry & Management Portal

Detailed Requirements Specification

1. Introduction & Purpose

The Temple Registry & Management Portal is a government digital solution designed to give District Collectors (DCs) and temple authorities across Karnataka a unified, secure, and structured platform to manage temple-related data. This document provides a comprehensive requirements specification covering all functional, technical, and operational aspects of the system.

1.1 Background

Karnataka is home to over 30,000 registered temples spanning Grade A (major endowments), Grade B (medium endowments), and Grade C (smaller temples). These temples are governed under the Hindu Religious & Charitable Endowments Act, and the District Collector plays a central oversight role. Currently, temple information is maintained in fragmented paper records and siloed departmental systems, making it practically impossible for DCs to quickly access reliable data on temple assets, staff, trusts, and geo-location.

1.2 Purpose of the System

This system serves two primary user groups:

- District Collector (DC): To search, locate, and inspect all temple data within their jurisdiction — across geographic hierarchies and temple grade classifications.
- Temple Authority: To log in to the portal and proactively share, update, and manage their temple's profile, assets, trust details, and staff records.

1.3 Scope

- Geo-hierarchical temple search: City → District → Taluk → Hobli
- Temple classification by Grade A, B, C
- Temple profile management: address, deity, history
- Trust and board member details
- Employee and contractor records
- Asset declarations submitted to DC
- Secure, role-based web portal for both DC and temple authority users
- Document upload and management capabilities
- Audit trails and reporting

2. Stakeholders & User Roles

2.1 Primary Stakeholders

Stakeholder	Role	Responsibilities
District Collector (DC)	Primary Viewer / Administrator	Searches and reviews all temple data in jurisdiction; receives asset declarations
DC Office Staff	Support Role	Assists DC in data review, exports, and correspondence with temples
Temple Authority / Trustee	Data Provider	Submits and updates temple profile, assets, trust, and staff data via the portal
HR & Charitable Endowments Dept.	Super Admin	Manages system-wide configurations, temple registrations, and grade classifications
State Government / Audit Bodies	Viewer	Reviews reports and asset disclosures for compliance and audits

2.2 User Role Permissions Matrix

Feature / Action	DC	DC Staff	Temple Auth.	Super Admin
Search Temples (Geo + Grade)	✓ Full	✓ Full	Own Temple	✓ Full
View Temple Profile	✓ Full	✓ Full	Own Temple	✓ Full
View Trust Details	✓ Full	Read Only	Own Temple	✓ Full
View Asset Declarations	✓ Full	Read Only	Own Temple	✓ Full
View Staff & Contractors	✓ Full	Read Only	Own Temple	✓ Full
Submit / Update Data	✗ No	✗ No	✓ Yes	✓ Yes
Approve Submissions	✓ Yes	✗ No	✗ No	✓ Yes
Export Reports	✓ Yes	✓ Yes	Limited	✓ Full
Manage Users	✗ No	✗ No	✗ No	✓ Yes
System Configuration	✗ No	✗ No	✗ No	✓ Yes

2.3 Glossary

Term	Definition
DC	District Collector — the senior IAS officer responsible for district-level administration in Karnataka

Term	Definition
Grade A Temple	Major temples with large endowments, significant pilgrim footfall, and high annual income as classified by HR&CE
Grade B Temple	Medium-scale temples with moderate income and community importance
Grade C Temple	Smaller temples with limited resources, often managed by local communities
Hobli	The smallest administrative unit in Karnataka, below Taluk level
Taluk	Administrative division below District level, comprising multiple Hoblis
HR&CE	Hindu Religious & Charitable Endowments — the Karnataka government department overseeing temple administration
Trust	The registered legal entity responsible for managing temple affairs and finances
Archaka	The hereditary priest who performs daily worship rituals at a temple
RBAC	Role-Based Access Control — a security model restricting system access based on a user's role
MFA	Multi-Factor Authentication — requiring two or more verification methods to log in
UAT	User Acceptance Testing — final testing conducted by end users before system go-live

3. Functional Requirements

3.1 Temple Search Module (DC Portal)

3.1.1 Geo-Hierarchy Search

The DC portal shall provide a cascading dropdown search that follows the administrative hierarchy of Karnataka:

1. State (pre-selected: Karnataka)
2. City / Town
3. District
4. Taluk
5. Hobli

Requirements:

- Each dropdown shall cascade based on the selection made in the parent dropdown.
- Partial selections shall be allowed — e.g., a DC can search at District level without selecting Taluk.
- All dropdowns shall be populated from a master geo-data table maintained by the Super Admin.

- Search results shall update dynamically without requiring a full page reload.
- Result count shall be displayed prominently before the DC views the list.

3.1.2 Grade-Based Filter

- The system shall allow filtering temples by Grade: Type A, Type B, Type C, or All Grades.
- Grade definitions shall be maintained per the Karnataka HR&CE Act classifications.
- Each search result card shall display the temple grade prominently as a visual badge.

3.1.3 Additional Search Filters

Filter	Type	Description
Temple Name	Text Search	Partial name match / full-text search
Deity Name	Dropdown / Text	Primary deity worshipped
Grade	Multi-select	A, B, or C
Trust Registration Status	Toggle	Registered / Unregistered
Asset Declaration Status	Dropdown	Declared / Pending / Overdue
Year of Establishment	Range Picker	From year — To year

3.2 Temple Profile View

3.2.1 Temple Master Information

Upon selecting a temple from search results, the DC shall be presented with a detailed Temple Profile page containing the following sections:

- Temple Name (primary and alias names)
- Registration Number and Grade (A / B / C)
- Primary Deity and Religious Tradition (Shaivite, Vaishnavite, Shakta, etc.)
- Year of Establishment / Historical Period
- Official Address: Door No., Street, Village/Town, Hobli, Taluk, District, PIN Code
- GPS Coordinates (Latitude, Longitude) with embedded map view
- Contact Person Name, Designation, Mobile, Email
- Temple Photograph (uploaded by temple authority)
- Language(s) of Worship
- Linked Mutts or Sub-Temples (if any)

3.3 Trust & Board Details Module

3.3.1 Trust Information

Data Field	Format	Mandatory
Trust Name	Text	Yes
Trust Registration Number	Alphanumeric	Yes
Date of Registration	DD/MM/YYYY	Yes

Data Field	Format	Mandatory
Registering Authority	Text	Yes
Trust Type	Dropdown (Public / Private)	Yes
Trust PAN Number	Alphanumeric (10 chars)	Yes
Bank Account Number	Numeric	Yes
Bank Name & Branch	Text	Yes
Annual Income (approx.)	Currency (INR)	No

3.3.2 Board Members

- The system shall capture details of all trustees and board members.
- For each board member: Full Name, Aadhaar Number (masked), Designation on Board, Appointment Date, Tenure End Date, Contact Number, Address.
- The system shall display current vs. past board members separately.
- Meeting minutes upload shall be supported (PDF format, max 10 MB).

3.4 Employee & Contractor Module

3.4.1 Temple Staff / Employees

Data Field	Description
Employee Type	Priest (Archaka), Administrative Staff, Maintenance, Security
Employee Name	Full legal name
Employee ID	Internal HR identifier
Date of Joining	DD/MM/YYYY
Designation	Role title
Salary Grade	Pay grade classification
Contact Details	Mobile, Address
Status	Active / On Leave / Retired

3.4.2 Contractors & Service Providers

- Contractor Name (Individual or Company)
- GST Registration Number
- Type of Service (Civil Works, Electrical, Security, Catering, Events, Other)
- Contract Reference Number and Work Order Date
- Contract Period: Start Date → End Date
- Contract Value (INR)
- Payment Status (Pending / Completed / Disputed)
- Uploaded contract document (PDF)

3.5 Asset Declaration Module

This module captures all assets declared by the temple to the District Collector. It is a critical transparency and accountability feature.

3.5.1 Immovable Assets

Asset Type	Required Fields
Agricultural Land	Survey Number, Village, Area (acres), Owner of Record, Patta Status
Temple Complex / Buildings	Location, Total Area (sqft), Year Built, Structure Type, Valuation
Leased Properties	Property Address, Lessee Name, Lease Period, Monthly Rent, Agreement copy
Other Land Holdings	Location, Area, Usage type, Revenue Department reference

3.5.2 Movable Assets

- Gold and Silver Items: Item description, Weight (grams), Purity, Approx. Value
- Idols and Sacred Artifacts: Material, Age/Period, Known Provenance, Museum-grade classification
- Vehicles: Registration Number, Make/Model, Year, Purpose
- Electronic & Office Equipment: Item list with serial numbers and approximate value
- Financial Assets: Fixed Deposits (Bank, Amount, Maturity), Investments

3.5.3 Declaration Workflow

6. Temple authority submits asset declaration via portal.
7. DC office reviews declaration and can accept, query, or flag for physical verification.
8. Upon acceptance, the system issues a digital acknowledgement to the temple.
9. Overdue declarations (not submitted within the financial year) are flagged with alerts.
10. All declaration history is version-controlled and auditable.

4. Temple Authority Login Portal

4.1 Registration & Authentication

- Temple authority registration shall require a valid Government-issued Temple Registration Number.
- Identity verification via Aadhaar-based OTP (Aadhaar eKYC integration or manual verification).
- Multi-Factor Authentication (MFA) shall be enforced for all logins.
- Password policy: Minimum 10 characters, must include uppercase, lowercase, number, and special character.
- Account lockout after 5 consecutive failed attempts (30-minute lockout).
- Session timeout after 30 minutes of inactivity.

4.2 Temple Authority — Data Submission Capabilities

Module	Action	Details
Temple Profile	Create / Update	Submit or revise all master temple data fields
Trust Details	Create / Update	Submit trust registration and board member info
Staff Records	Create / Update / Delete	Manage employee records with supporting documents
Contractor Records	Create / Update / Delete	Manage contractor details and upload agreements
Asset Declaration	Submit / Revise	Annual asset declaration with supporting documents
Documents	Upload	Certificates, licenses, letters — PDF format only, max 10 MB/file
Queries / Notices	View & Respond	Respond to queries raised by DC office

4.3 Submission & Approval Workflow

11. Temple authority completes data entry for a module.
12. System validates mandatory fields and format; inline errors are displayed.
13. User submits the form — status changes to 'Pending Review'.
14. DC office is notified via email/SMS of the new submission.
15. DC reviews submission — can: Approve, Request Clarification, or Reject.
16. Temple authority receives notification of the decision.
17. On approval — data is published to the DC view. On rejection — temple authority can correct and resubmit.

4.4 Dashboard for Temple Authority

- Status of each data module: Not Started / In Progress / Submitted / Approved / Rejected
- Upcoming deadlines: Annual asset declaration due dates
- Notification inbox: Messages and notices from DC office
- Download section: Acknowledgement letters, approved declarations
- Submission history log
